

## ORC LICENSE

This Open RPG Creative license (“*ORC License*”) grants the right to use Licensed Material subject to the terms and conditions set forth and referenced as follows:

### **I. Definitions.**

- a. ***Product Identity*** means trademarks, trade dress, and non-functional and creative expressions that are not essential to, or can be varied without altering, the ideas or methods of operation of a game, including works of visual art, music and sound design, and clearly expressed and sufficiently delineated characters, character organizations, dialogue, settings, locations, worlds, plots, or storylines, including proper nouns and the adjectives, names, and titles derived from proper nouns. The term Product Identity shall in no event include elements that have been previously designated as Licensed Material, that are Adapted Licensed Material, that constitute Third Party Product Identity, or that are in the public domain.
- b. ***Licensed Material*** means (1) any material contained in a Work that would otherwise constitute Product Identity but that has been expressly identified as Licensed Material by a Licensor, and (2) those expressions contained in a Work of ideas and methods of operation of a game, that are comprised of systems, procedures, processes, rules, laws, instructions, heuristics, routines, functional elements, commands, structures, principles, methodologies, operations, devices, and concepts of play, and the limitations, restraints, constraints, allowances, and affordances inherent in gameplay, including but not limited to expressions describing the function of or providing instructions as to the following:
  - i. Creation and play of player and non-player characters (such as statistics, attributes, statblocks, traits, classes, jobs, alignments, professions, proficiencies, abilities, spells, skills, actions, reactions, interactions, resources, and equipment);
  - ii. Systems and classifications applicable to gameplay (such as alignments, backgrounds, classes, experience points, levels and leveling up, encounters, combat, initiative and turn order, movement, monster statistics, creature types, traps, conditions, buffs and debuffs, terrain types, challenge ratings, difficulty classes, skill checks, saving throws, resting and resource management, classification of magic systems, spell and ability effects, looting, items and equipment, diplomacy systems, dialogue options, and outcome determination);
  - iii. Methods of determining success, failure, or outcome, and any expressions of such methods or of such successes, failures, or outcomes; and
  - iv. Methods and mediums by which players play the game (such as dice rolling, random number generation, coin flipping, card drawing and play, applying modifiers to results of chance, creating or filling in character sheets, moving and interacting with tokens or figurines, drawing maps and illustrations, speaking, messaging, acting, pantomime, writing notes, asking questions, and making statements).

For the avoidance of doubt, the term “Licensed Material” expressly excludes Product Identity except to the limited extent expressly designated as such by the Licensor in the notice published pursuant to Article III.

- c. ***Adapted Licensed Material*** means Derivative Works that Use all or any portion of the Licensed Material that You create or publish to the limited extent that such Derivative Works would otherwise constitute those forms of Licensed Material set forth in Section I.b.(2) above. Adapted Licensed Material expressly excludes works that would constitute Product Identity.
- d. ***Copyright and Similar Rights*** means copyright and/or similar rights closely related to copyright including, without limitation, performance, broadcast, sound recording, and Sui Generis Database Rights, without regard to how the rights are labeled or categorized. In no event shall Copyright and Similar Rights include trademark or patent rights.

DRAFT ONLY. FEEDBACK REQUESTED. 3<sup>RD</sup> DRAFT

SORRY FOLKS, FINAL DRAFT COMING SOON!

Thanks for all your help! You have made the ORC so much better!

Kindly,  
Brian
